

The Master Plan

In 2019 the College engaged our architects, TPG, to prepare a Master Plan for the future growth of the College. The College Master Plan provides an aspirational framework to guide campus development and new investment. This is a key objective of the College Strategic Plan and incorporates the development of a range of new and inspirational '21st Century' learning spaces, together with substantial enhancements to the College's existing facilities.

The Plan reflects the College Board's commitment to the ongoing provision of high-quality learning environments with buildings and spaces that both inspire and empower our staff and students to grow and develop their God-given gifts and talents in our beautiful tropical setting.

Completed Projects:

- Hector Costello Innovations Centre
- Kindergarten Nature Playground

Next Projects to be completed:

- Senior Primary Building
- Art Room Refurbishment
- Music Centre

Community Consultation

The Master Plan was jointly developed through consultation with representatives from all key-stakeholders within the College community in collaboration with our architects. Opportunity was given to both staff and families of the College as well as our Freshwater Church wider community members to attend forums.

General Layout

The College's built and natural environments will be significantly enhanced through the establishment of new and inspirational 21st Century learning zones. In addition, our students and staff will enjoy substantial upgrades to existing buildings, providing larger, light-filled contemporary learning spaces. The College's 'school in a garden' theme will continue as we combine design elements from our beautiful tropical setting with the built landscape. The addition of environmental and sustainability elements underlies the College's commitment to work in harmony with the beauty of God's creation.

Primary Building

This impressive 21st Century learning environment has been purposefully designed to serve the developmental needs of our Senior Primary, Grade 5 and 6 students. The beautiful, light-filled space comprises four large separate classrooms, a stage and a resource centre. The new building will further empower our teaching teams to grow and develop the God-given gifts and talents of our students.

Hector Costello Innovation Centre

In 2019 our College was truly blessed to officially open the new \$2.3million Hector Costello Innovation Centre, fitted with a range of new engineering and wood manufacturing machinery, 3D printers, laser cutters and robotics technology. This Centre of creativity and innovation will help us to take technology related learning, from Grade 4 to Year 12, to a whole new level.

Kindergarten Nature Playground

Completed in September 2019, the Kindergarten Nature Playground gives our students the opportunity to explore the world around them. The external space is designed to spark creativity and curiosity enabling students to expand their gross motor skills and develop in confidence.

MasterPlan

MasterPlan

- Freshwater Church
 - Administration / Reception
 - Prep Centre
 - Existing Primary Buildings
 - Future Primary Buildings / Extensions
 - Existing Secondary Buildings
